Ocean Forest

Good Things from the Earth and Sea!

The Ultimate potting soil-everything your plants need, in one bag. Ocean Forest is a powerhouse blend of premium earthworm castings, bat guano, and sea-going fish and crab meal.

Aged forest products, sandy loam, and sphagnum peat moss give Ocean Forest its light, aerated texture. Start with Ocean Forest and watch your plants come alive!

Garden tip: Perfect for containers and ready to use right out of the bag. Ocean Forest is pH adjusted at 6.3 to 6.8 to allow for optimum fertilizer uptake. There's no need for nitrogen fertilizers at first; instead try an organic blend like FoxFarm Big Bloom Liquid Plant Food to encourage strong branching and a sturdy, healthy growth habit.

Happy Frog

Your potted plants deserve the best. Their roots can't seek out nutrients in the ground, so you have to bring it to them. That's why Happy Frog Potting Soil is alive with beneficial microbes and fungi that help break down organic matter and feed the plant root.

Between the earthworm castings, the bat guano, and the aged forest products, your container plants have never felt so good. And don't worry- FoxFarm uses only the highest quality, premium ingredients- no cheap fillers, no topsoil, no sludge.

Garden tip: Happy Frog Potting Soil is perfect for container gardens. Whether you're growing a ficus in the dining room, a geranium on the patio, or a lemon tree on the deck, use our Potting Soil full strength in your containers. For a spectacular harvest, add our Happy Frog Fruit & Flower Fertilizer. Then sit back and enjoy the results.

MYCORISE® PRO is a beneficial vesicular-arbuscular endomycorrhizal (VAM) fungus (Glomus

Pro-Mix HP

Provides significant drainage capacity, increased air porosity and lower water retention.

Pro-Mix BX

and perlite high-quality mix, this formulation is ideal for growers looking for a general purpose medium which creates a well-balanced growing environment.

Pro-Mix PGX

Formulated with vermiculite for increased buffering capacity and nutrient retention at the early stages of plant growth.

Pro-Mix HPCC Coir Micorise

With unique chunk coir reducing soil compaction and carefully selected peat moss, this formulation provides qualities promoting growth needed to optimize the quality of their hanging baskets, large containers and long-term crops.

Pro-Mix YP Biofungicide

Special formulation for young plant production.

Pro-Mix MP Organik

Organic-certified growing medium that delivers well-balanced air/water qualities.

50802190	3.8 cu ft	Sunshine Mix #7	1	30/plt

SUNSHINE MIX #1: General use provides rapid growth from seedling to maturity for a wide range of crops. As Sunshine's general use mix, it contains Canadian Sphagnum peat moss, perlite, major and minor nutrients, gypsum, wetting agent, and dolomitic lime.

SUNSHINE MIX #2: Basic is appropriate for the same general uses as Mix #1, but has no nutrients added, allowing you to have complete control over fertilization. What it does contain is Canadian Sphagnum peat moss, perlite, gypsum, wetting agent and dolomitic lime.

SUNSHINE MIX #3: Germinating Mix is suitable for a wide range of growing, particularly where less frequent watering is desired. It has a shorter fiber peat than our other mixes, and has a lower fertilizer charge than Mixes #1 and #4 to protect seedlings. Contains Canadian Sphagnum peat moss, vermiculite, dolomitic lime, gypsum and wetting agent.

SUNSHINE MIX #4: Aggregate Plus #4 is recommended where higher air capacity and faster drainage are needed, during winter months, with highly sensitive crops, or where frequent leaching is required. Contains Canadian Sphagnum peat moss, perlite, nutrients, gypsum, wetting agent and dolomitic lime.

SUNSHINE MIX #5: Plug is designed to promote better root development in ornamental and vegetable transplant plugs. Mix #5 contains Canadian Sphagnum peat moss, fine perlite, gypsum, dolomitic lime for pH adjustment, wetting agent and a low fertilizer charge to protect you seedlings.

SUNSHINE MIX #7: Gel Plus #7 is particularly suited for plants in containers and crops that receive less than ideal care once they leave the greenhouse. Gel Plus #7 contains Canadian Sphagnum peat moss, perlite, wetting agent, nutrient charge, gypsum and a super absorbent polymer to hold significant amounts of water close to plants.
